Linnæus University

Finalizing the MDSE Project

We are quickly closing in on the final week of the project course. Project presentations are during the last week of the course, and, as agreed during the seminars, they will be during the usual slot on Thursday, January 15, at 13:15. We also expect project and individual reports from you. You can submit the reports until the last day of the current learning period (Sunday, January 18). This document provides information about how the remaining group activities in the course

Presentations

They take place on Thursday, January 15, at 13:15, in the assigned course classroom. Each group is allocated a 30-minute slot that should include 1) a presentation and 2) a demo.

The presentation should follow a strict format.

- 1 slide with the title and group members' names
- 2 Intro slides to set the scene.
- 1 slide for an overview of the Application.
- 1 slide that presents your MDE system architecture with models, transformations, etc.
- 5 slides for specific MDSE problems and their solutions in your system.
- 2 slides for reflections and a discussion on improvements and extensions of your system.

The demo should focus on key use cases.
All participants must participate and demonstrate skills on the MDE concepts and technologies

Project report (group)
You are expected to provide a written report for the project

The format

The project report should follow the presentation format. Maximum 10 pages, 11pt Times New Roman with 2,5 cm margins. Submit as a pdf and create a bundle with the code. In the bundle, there should be instructions (1 additional page) for how to set up the IDE to get things up and running. Send it by Sunday, January 18—only 1 submission per group.

Retakes
If you cannot attend the presentations during the last week of the course, you should contact the course teachers to arrange a meeting no later than January 29!
